DETAILED ACTION

Election/Restrictions

Combination/subcombination

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 15-19, 23-27, 32, 28, 29, 30 and 31, drawn to monitor gas mixture having pressure, temperature and density, classified in class 702, subclass 24.
 - II. Claims 20, 21 and 22, drawn to monitor gas mixture having pressure, temperature and density using capacitance type sensing, classified in class 702, subclass 47.

The inventions are distinct, each from the other because of the following reasons:

Invention I and II are related as combination (invention I) and subcombination (invention II). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particular of the subcombinations as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention II, the combination as claimed does not required monitor gas mixture having pressure, temperature and density using capacitance type sensing. The subcombination (invention II) has separate

Art Unit: 2863

utility such as a monitor gas mixture having pressure, temperature and density using capacitance type sensing.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Paul Neils on 9/14/05 no election was made. Affirmation of this election must be made by applicant in replying to this Office action. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

Applicant is reminded that upon the cancellation of claims to a non-elected nvention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung S Lau whose telephone number is 571-272-
